

MediaPortal Wiki

MediaPortal

MediaPortal is a free open source media center software, ideal for turning your PC into a very advanced multi media center, or Home Theater PC (HTPC).

Using MediaPortal, you can listen to your favorite music and radio; watch your videos and DVDs; or view, schedule and record live TV, much like a digital video recorder such as TiVo, but better. And that's only the basic features!

About this Wiki

This wiki contains some basic information about MediaPortal.

If you are interested in contributing to the documentation (or in any other way), please take a look at the [contribution guide](#).

Besides the Wiki additional information can also be found in

- [MediaPortal 1's issue tracker](#) (JIRA); or
- [MediaPortal 1 support forums](#) ([English](#), [German](#)).

Feel free to open a new thread in the forum if you can't find the information you are looking for [after using the search functionality in Wiki, forum and Issue Tracker](#).

Our new Wiki offers **5511** pages on how to install, setup, use, customize and contribute to MediaPortal.
