- [TV support](#)

MP2 has support for many TV features including:

Live TV Electronic Program Guide (EPG) Managing scheduling and recordings

The plugin for this is called "SlimTV" but there are different TV Engines (TVE) that provide the features:

Using only MP1 components (NativeTV, TVE 3) Using only MP2 components (NativeTV, TVE 3.5) Using both MP1 and MP2 components (MPExtended)
