

Black Glass Nova

Black Glass Nova is a skin for Mediaportal.

It has been designed to work for the **1280x720, 1360x768, 1366x768 resolutions** (HD Ready), while it scales well to full hd. It's designed for low powered systems.

The skin should be easy to use and has a simple and clear look. The skin is actually a spinoff from the Black Glass Skin. It's a more fanart focused version of the main skin. It uses full color fanart in every screen.

Fanart is supported in every screen.

The skin has been designed to be used from the Basic Home screen. However, it works fine using the standard menu home screen.

A stand alone skin editor is available. It lets you edit your favorite basic home buttons.

Discussion Forum

If you want to report any issue or suggest any improvement, you can leave a message in the skin subforum: [Black Glass Skins](#).
