Overview

Configure or change settings that affect the Graphic User Interface (GUI).

GUI Settings

You can also configure GUI Settings using the MediaPortal Configuration Tool, see [Configuration > GUI](#)

Follow links below for details on the available GUI Settings:

- [GUI Settings MP](#)
 - [MP Skin Settings](#)
 - [General GUI Settings](#)
 - [Screen - Settings](#)
 - [Screensaver Settings](#)
 - [Thumbnail Settings](#)
 - [On-Screen Display Settings](#)
 - [Skip Step Settings](#)
- **File menu** - Enable or disable file menu inside MediaPortal plugins for Music, Videos or Pictures.
- **Pin** - when File menu is enabled you can enter a Pin for extra security for accessing the file menu.

You can also enable the File Menu and set a pin using [Configuration > GUI > File Menu](#)

To add, rename, delete, copy or move files within the MediaPortal interface, see [Managing Folders and Files](#).
