

# 1.14.x - MiniDisplay for SharpLibDisplay

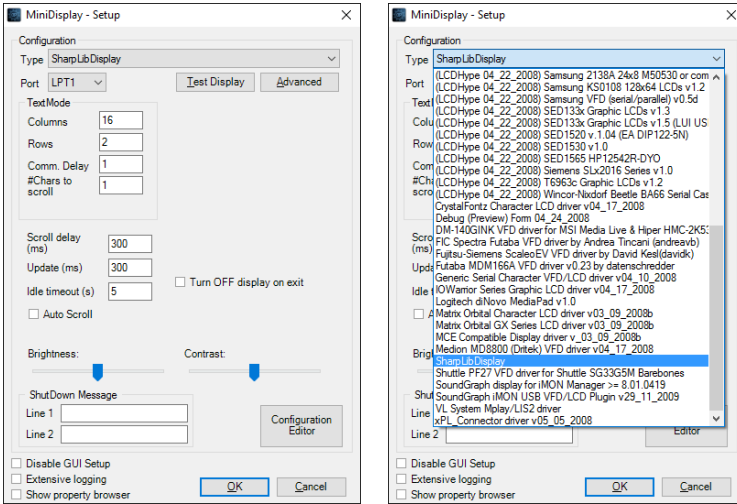

## Overview

SharpDisplayManager MiniDisplay driver has been replaced with SharpLibDisplay.

The new driver provided similar and extended functionalities.

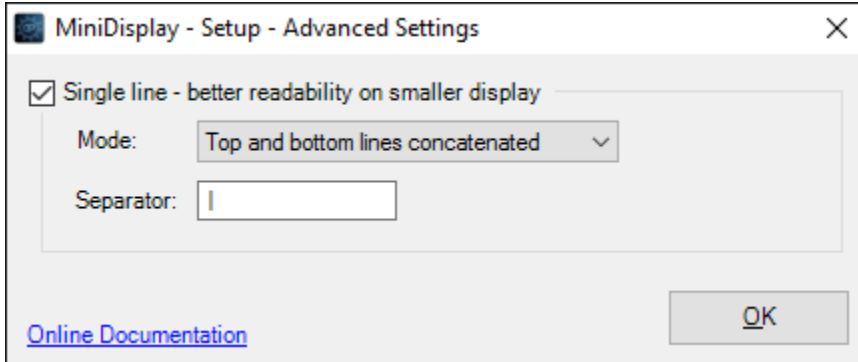

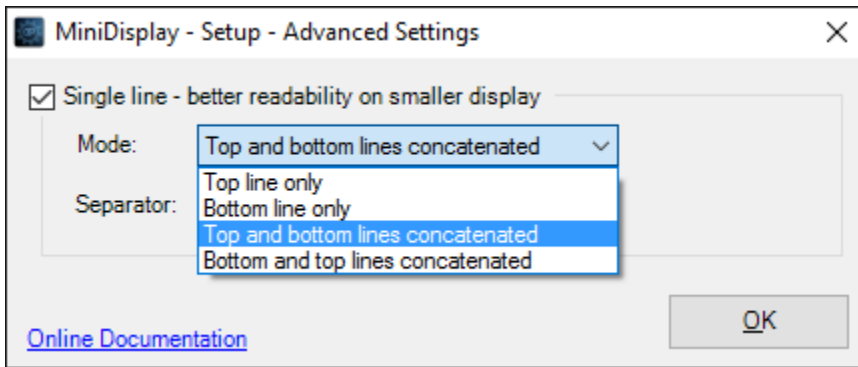

## Description of Change

We now provide a better driver for [SharpDisplayManager](#).

Our new SharpLibDisplay driver provides advanced configuration options notably allowing single lines usage for better readability on smaller displays.

See the [SharpDisplayManager](#) documentation for details on display support.
