MediaPortal 2

is the next generation media center software. Rewritten from scratch and not based on the MP1 source code it is making use of advanced technologies to bring you the best possible HTPC experience:

- Watch, schedule and record live TV
- Play videos, movies or series
- Play DVD or BluRay discs
- Listen to music
- Get weather information and the latest news on your big screen
- Play your favorite games
- and much more...

About this Wiki

This wiki contains some basic information about MediaPortal 2.

It still lacks a lot of details, but is constantly improved. If you are interested in contributing to the documentation (or in any other way), please take a look at the [contribution guide](#).

Besides the Wiki additional information can also be found in

- [MediaPortal 2's issue tracker](#) (JIRA); or
- [MediaPortal 2 support forums](#) ([English](#), [German](#)).

Feel free to open a new thread in the forum if you can't find the information you are looking for [after using the search functionality in Wiki, forum and Issue Tracker](#).
