

Music ASIO

This section is only visible in expert mode.

Configure ASIO (Audio Stream Input/Output) which allows musicians and sound engineers to access external hardware directly.

ASIO devices must be installed.

Music ASIO

General settings

Use ASIO (available with BASS only)

ASIO Device: Settings

—

Balance: 0.00

In case of multi-channel (not stereo) the left/right positions are interleaved between the additional channels.

- **Use ASIO (available with BASS only)** - check this box if you have an ASIO device installed
- **ASIO Device** - select your device from the drop down box and press **Settings** button to configure
- **Balance** - here you can adjust the left right balance of multi-channel audio (not stereo)
