

# Skin Functions

## Purpose

- **Required:** No
- **Type of Change:** Feature

Added new skin functions.

## Description of Change

The following functions are added.

- **skin.setFocus(*windowId,controlId*)** - Sets the focus to the specified control id in the specified window. Useful in <onclick> control attributes (e.g., button onclick).
- **plugin.isenabled(*pluginName*)** - Returns true if the specified plugin name is enabled. Useful in skin expressions.
