

# MediaPortal Wiki.mobile.phone

MediaPortal

MediaPortal is a free open source media center software, ideal for turning your PC into a very advanced multi media center, or Home Theater PC (HTPC).

Using MediaPortal, you can listen to your favorite music and radio; watch your videos and DVDs; or view, schedule and record live TV, much like a digital video recorder such as TiVo, but better. And that's only the basic features!

## About this Wiki

This wiki contains some basic information about MediaPortal.

If you are interested in contributing to the documentation (or in any other way), please take a look at the [contribution guide](#).

Besides the Wiki additional information can also be found in

- [MediaPortal 1's issue tracker](#) (JIRA); or
- [MediaPortal 1 support forums](#) ([English](#), [German](#)).

Feel free to open a new thread in the forum if you can't find the information you are looking for after using the search functionality in Wiki, forum and Issue Tracker.

Our new Wiki offers **5511** pages on how to install, setup, use, customize and contribute to MediaPortal.
