

Duration in Video Shares View

Purpose

- **Required:** No
- **Type of Change:** Feature

Users now have the option in MP Configuration > GUI > GUI settings to 'Add media info to the Video database for user in Share View'.

To show the duration info in the list view (listcontrol) the skin should use

```
<textcontent3>#duration</textcontent3>
```

. See XML example below.

Description of Change

When the new option in Config is enabled, or users select Update Media Info from context menu, #duration will now also be populated.
