

Image importer

Table of Contents

- 1 [Overview](#)
- 2 [Database fields](#)
 - 2.1 [Standard file information](#)
 - 2.2 [Geolocation](#)

Overview

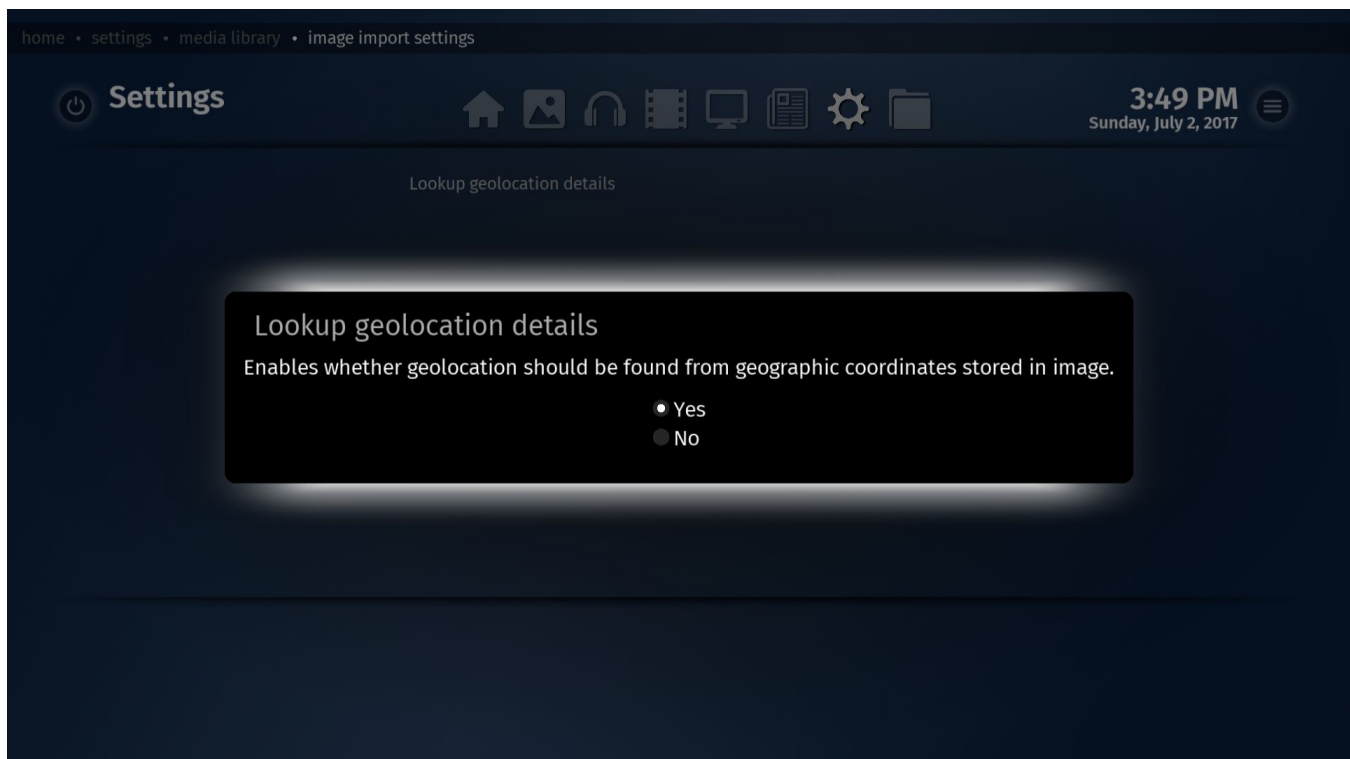

The Image importer reads image files and adds them to the database.

Database fields

Standard file information

- Title (File name)
- Year
- Size

Geolocation

Activate Geolocation settings to populate additional geolocation information:

- Country
- State
- City

These fields require the picture files to contain geographic coordinates.
