

# Context Menus

A Context Menu, sometimes called an Actions Menu, allows you to interact with MediaPortal and select actions which can be performed in the window displayed or based on the selected item. As implied by the name, these context menus vary according to the window you are displaying.

To access a context menu, such as the video context menu displayed below, press the **Info/More** key on your remote, or

A context menu is a type of dialog. See [Dialogs](#) for further information.
