

Skin Expressions

Purpose

- **Required:** No
- **Type of Change:** Feature

Skin properties provide great flexibility to the skin designer, but sometimes simple property replacement is not enough. One such case is when you need to combine a property with a localized string. Skin expressions provide a way to calculate more complex operations based on skin properties, localizable strings and other.

Description of Change

See [Skin Expressions](#) for more information.

Additional Information and References

- **Mantis Issue:** 3023
